July, 2014

Dear Parents, Teachers, and Staff,

In accordance with the regulations of the Environmental Protection Agency (EPA), we are required to notify parents, teachers, and other employees each year of the availability of the Asbestos Management Plan (Management Plan) and the response actions we are taking to maintain asbestos containing materials in our school.

The Asbestos Management Plan has been in place for many years and is updated every three years. The Plan is prepared for our school by a certified environmental company chosen to ensure the proper maintenance and responses for asbestos-containing materials or suspect asbestos-containing materials in our school. Appropriate response actions have been taken, including abatement activity in the primary wing of the school during the summer of 2013. Continued appropriate response actions will be taken as needed to ensure the asbestos is maintained in good condition

A periodic surveillance of the school has occurred every six months since the original inspection. Additionally, formal re-inspections were completed every three years since the original inspection. Copies of these reports are on file in the main office of the school.

Custodians and maintenance workers have been instructed on the health effects of asbestos and trained how to correctly repair minor concerns or contain problem areas until the appropriate authorities can take appropriate action. They have also have received training on the importance of maintaining this material in good condition during their normal day to day activities.

If you wish to review the Management Plan, please contact me and I will be happy to schedule a time to meet with you.

Sincerely,

Patrick Leshner,
Business Manager, St. Columban Parish
